

Grading Policy for Mathematics

- Grades are weighted based on the following:
 - 30 % Daily Work
 - 20% Notebook
 - 50% Tests

- If students **complete** their homework assignment, they receive one point extra credit for each correct answer. Five problems will be chosen daily from their homework assignment to be given a grade on. The extra credit points are added onto their homework score.

- If they turn in an **incomplete assignment**, they receive a **grade** on the assignment and no extra credit points will be given. If they don't turn in an assignment at all, they will receive a zero. This is represented by an NHI (not handed in) in Powerschool.

- Students also have an opportunity to retake tests. If they score **BELOW** a 70, they must take a retake. If they score **ABOVE** a 70, it is their choice. Students have one week to complete the retake, otherwise they lose that opportunity to raise their grade.
